**September
2026**

All correspondence to be addressed to: The Secretary, 77 Carrington Blvd, Thomastown, Vic. 3074

**The next Committee meeting will be at 7.30pm on Wednesday 7th October
Venue: TBA.**

**The Warringal Orchid Society meets at the Watsonia Community Hall,
35 Lambourn Road Watsonia**

The next Meeting will be on Wednesday 16th September

The hall will be open from 7.00pm. You are welcome to bench plants for judging and to socialise with other members. A sales table operates with pots and other orchid accessories when available. Members are able to submit up to 6 orchid plants for sale (plants to be well established in their pots and in a clean condition). The society deducts a 10% commission on sales. Plants should be listed on a sales form available at sales table.

Please be seated on time for meeting to commence at 8.00pm.

This month: Our speaker this month will be Hendrik Venter. He will entertain us with all the news and wonders of the 24th World Orchid Conference held in Germany in March this year. Hendrik is an accredited AOC Judge and author of the highly respected book, *Orchids in South Africa: A gardener's guide*.

CLUB NOTICES

New growers group –

New members wishing to develop their orchid-growing skills are welcome to join the New Growers Group conducted by Jason Khoo. This group runs for approximately 30 minutes prior to the start of the monthly meeting.

Monthly meeting - Supper

All members are invited to bring a plate of supper to share at the end of our meeting. We all value this social time, so do not leave it to the same providers every month. Also, please help pack up chairs/tables etc prior to enjoying supper.

Monthly meeting – Setting up

Help is needed to set the hall up for our meeting. The hall is open from 6.00pm. Come early and get to know other members as you help set-up.

Bulletin Postage

Due to increased cost of postage, members wishing for a paper copy of bulletin will incur a \$20.00 annual fee added to their membership. Email copy of bulletin is free of charge.

New members this month

We welcome the following people who have recently joined the club:

- Qing Qin Zeng
- Qiao Yan Zeng
- Kaoxin Zeng.

Please introduce yourself when you see them at club functions.

Warringal Orchid Society QR code

Committee

Any member interested in joining the committee should contact our President, Andrew Fernandez, for more information about what is involved.

SPRING SHOW — Sat 3rd Oct and Sun 4th Oct

- **Helpers** wanted. Please chat with Jerry Karbownik at the September meeting to let him know that you assist at the show.
- **Please read the Show Schedule carefully** as it has important information for you, whether you are showing plants for judging, or submitting plants for sale.
- Please note that the show stays open until 4.00 pm both days; however the **sales area closes at 3.30 pm.**

CONGRATULATIONS to our new Life Members

... and thank you!

Shining a spotlight on our new life members ...

Barbara Duncan

When did you join Warringal Orchid Society? I can't quite remember. I think sometime in the early 1990's. I wanted to join earlier but my work commitments prevented me from attending meetings or shows.

Roles in the club over time. My involvement began when I was asked to write up the results for the Judges at monthly meetings, then helping with the paperwork for Show Entries. This all happened before I even thought about becoming a Judge. That progressed to helping set up Shows under direction from Ern Bevan and Ken Box, and then somehow I became a Show Marshall. This now involves aspects of the Show e.g. setting up, changes to schedules.

What other roles do you have in the orchid world? I suppose the main one now is as a Judge, but I also assist at Club level where I can e.g. giving a plant (bench) commentary. I am also a member of the Australian Orchid Foundation

What got you started growing orchids? And your first orchid? A day off work caused me to visit the newish Collectors' Corner, where I purchased 2 orchids – a kingianum and a Sarcochilus Hybrid, neither of which were very good, but they made me start learning about orchids. Then I found an advertisement to join the Victorian Orchid Club in a Gardening magazine.

Who have you learned most from, in orchid growing? Three people – Ern Bevan, Ian Paul and Ken Box. All could be considered to be mentors, advisors and helpers with my growing. Through them I became interested in growing Zygopetalums and Masdevallias. There are many others over the years who have also helped me generously with their time and plants.

Orchids that challenge you, as a grower. I cannot grow anything requiring heat. If the conditions say a minimum of about 8 degrees C I will give it a go, sometimes with great success, sometimes not.

What orchid/genus gives you most pleasure to grow? Without realising it, I found myself having more Species orchids than Hybrids and I think this still holds true today. The genus that still gives me the most pleasure is when I flower a Cymbidium goeringii. I also still get pleasure from flowering Z. Artur Elle 'Essendon' Z (an original back bulb) and Z. Kiwi Choice 'K B', among the many struck back bulbs given to me by mentors.

What fascinates you about orchids, that keeps you going/growing? I think it is their great diversity world wide.

Is there anything else you would like to add? It is the friendships you make along the way.

Jason Khoo

When did you join Warringal Orchid Society? I think I first joined Warringal orchid society way back in 1986.

Roles in the club over time. I was first approached by the late Rosemary Carter who invited me to join the committee in 1987, when we had the meeting in Vi Seward's house and John Filgate was the president. I was in the committee for a long while on and off.

What other roles do you have in the orchid world? I joined the judging panel the following year (1988) I qualified as an orchid judge in 1992. I judged various shows around Melbourne and the AOC conference in Werribee and Perth. I attended WOC in KL in early 2000 and was captain of Oncidium section for judging. Subsequently I also attended WOC in Johannesburg and Singapore, as well APOC in Malaysia. I was also invited to judge in the show in Calgary when I was visiting friends in Edmonton, Canada.

What got you started growing orchids? And your first orchid? , I was captivated by the first green cymbidium when I first saw it in Selfridges in London. Of course, I had always grown orchids like Vandas, Arandas, Cattleyas, and many others when I was a teenager living in Penang, Malaysia .

Who have you learned most from, in orchid growing? As I was training as a judge, I was mentored by the late Trevor Myers. He loaned me orchid books and orchid journals to increase my orchid knowledge; I consumed these with gusto, metaphorically.

Orchids that challenge you, as a grower. My most challenging orchid is miltoniopsis. I leave it to the experts.

What orchid/genus gives you most pleasure to grow? I grew cymbidiums first and I still love them. Later I expanded to other orchid generas.

What fascinates you about orchids, that keeps you going/growing? . I travel extensively and have seen how orchid species grow in situ and try to replicate in my growing condition to see why I failed. I did a tissue culture course to enable me to breed my own plants.

Is there anything else you would like to add? Know your limitations and you will be fine.

Kim Lam

When did you join Warringal Orchid Society? I do not recall exactly when, but it is more than 15 years.

Roles in the club over time. As a club member, I have previously held the role of committee member for a few terms, but then resigned due to family commitments. I currently volunteer as a club member by helping the club whenever required in all areas, but the main roles are Show Marshall, credit card sales and assisting Alf for balancing the intake of all venues at the end of the show.

What other roles do you have in the orchid world? I am primarily an AOC judge but also a member of 5 other orchid clubs and 1 overseas.

What got you started growing orchids? And your first orchid? The first orchid I received was from my sister. It was a medium Cymbidium with dark brown coloured flowers. It was so lovely and got me interested into growing them. Then I was introduced to John Sharam who is a member of Warringal Orchid Society. I was also lucky to visit his mother-in-law's house when she was repotting

Cymbidiums. She told me that “they are tough plants so no need to be gentle with them”. I remember this advice when I divide and repot my Cymbidiums.

Who have you learned most from, in orchid growing? I have learned a lot from people whom I have met and encountered during judging, at monthly meetings, at orchid conferences and shows. I am shy to ask, but I do ask when I want to grow something better. Two people who shared a lot of their experiences and knowledge, which helped me to grow better, are Ken Box and Barbara Duncan. Both of them are my ‘unofficial mentors’.

Ken had taken time to explain and discuss about different types of orchids. He was also the one who introduced to me to other orchids beside Cymbidiums, by giving me small divisions of different genera and back bulbs to try. Ken was also the one who inspired me to grow Paphiopedilums. He gave me a small division of Paphiopedilum in August 2013 that is still growing today. It gives me a great pleasure to see it flower very year; it reminds me of Ken. Ken was also got me involving in to become a Show Marshall in the early years.

Barbara is a very direct person who does not hesitate to provide guidance and advice if things are not right. She takes time to correct and explain why, for which I am very much appreciative. I value the times that I have spent with her, especially when Barbara drove us to country clubs such as Wangaratta and Albury to judge in the last few years. It is a long way but we talk and discuss about anything and everything to make a drive feel shorter. I recall vividly one time when I turned up at her house around 3:30 am in the torrential rain so we could be ready for a drive to a country club to judge early in the morning. Barbara opened the door and asked me what time it was, and why I was there so early? I simply said with the harsh weather, the driving will be hard, a bit of extra time will help and we did not want to be late for the judging, didn’t we? Barbara just laughed and shook her head.

What orchid/genus really challenges you, as a grower? All genera are challenging to me as they are all different. But the most challenge that I have found recently are the micro-mini orchids which require constant temperature, nurturing and care; I do not have the right environment and conditions to provide for them but I do like to grow them.

What orchid/genus gives you most pleasure to grow? I have gone through phases. At the moment the genera that give the most pleasure to grow are Paphiopedilums and Masdevallias. I am proud of all of them when they are in bloom and flower well.

What fascinates you about orchids, that keeps you going/growing? The most fascinating thing about orchids are when they are in bloom, especially the seedlings. Even though you have researched and sort of expected the outcome based on their parents’ traits, the outcome of the seedlings sometimes are not what you are expecting. Sometimes they are worse and sometimes they are better than their parents. That is a surprise for all orchid growers. Another fascinating aspect of growing orchid is that you can grow something when you (or other people) think that you cannot.

Is there anything else you would like to add? I love flowers thus I like to grow orchids and garden plants that provide me flowers all year round and that what I try to achieve. Life is full of surprises. I am not afraid of trying something new and that is how I am always learning.

WARRIGAL ORCHID SOCIETY – 2026 WINTER SHOW SUMMARY

AWARD	PLANT NAME	PLANT OWNER
GRAND CHAMPION ORCHID	Dinema polybulbon	A. Rogers
RESERVE CHAMPION ORCHID	Oncostele Midnight Miracles	M. Coker
CHAMPION CYMBIDIUM ORCHID	Cym. Mem. Myrtle Wain 'Lachie'	D. Wain

Display of Orchids - Novice/Advanced Novice	N/A	
Best Basket of Orchids	Basket '3'	H. Truong

Vale John Prosser

It is with sadness that we advise of the death of John Prosser, aged 87 years. John had been a member of our club for many years, and a committee member for several years; he was last on our committee in 2021. He had been in poor health following a fall in recent years, and not seen so much at meetings and shows.

He was well known for his beautiful cymbidiums, one of which was Cymbidium Cherry Blossom 'Profusion'.

Our sincere condolences to his family.

2026 WINTER SHOW WINNERS IN GLORIOUS COLOUR

**GRAND CHAMPION
ORCHID
and
CHAMPION
SPECIES ORCHID
and
CHAMPION
SPECIMEN ORCHID**

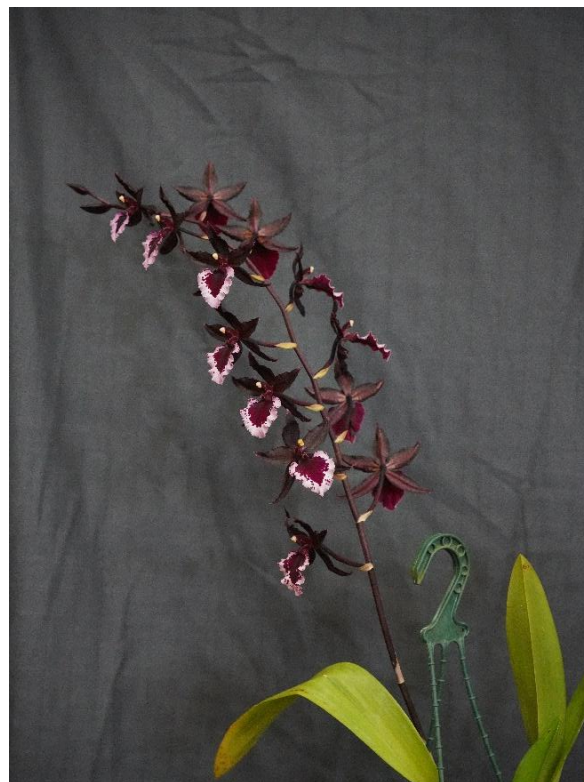

Dinema Polybulbon
grown by A Rogers

This species can be found from Mexico to Nicaragua and also in Jamaica and Cuba, in humid mixed forests, mainly on oaks, as a miniature-sized, warm to cold-growing epiphyte or lithophyte, at elevations of 600-3200 metres. It was originally known as *Encyclia polybulbon*. Whilst classified as miniature, this orchid can rapidly cover a large area due to its vigorous and rambling growth habit.

**RESERVE
CHAMPION
ORCHID
and
CHAMPION OTHER
HYBRID ORCHID
and
Best Other Hybrid
Orchid - Open**

*Oncostele Midnight
Miracles*
grown by M Coker

Oncostele Midnight Miracles is an epiphytic orchid hybrid originated by Truford in 2007. It is a cross of *Rhynchostele bicktoniensis* x *Oncidium cariniferum*. It is considered a "primary hybrid" because it is a cross between two species. It features strap-shaped evergreen leaves, pseudobulbs, and striking multi-coloured or dark red to splash-patterned flowers that bloom for about six weeks, in spikes of 15-20 flowers. It has also been known as *Colmanara Masai Red*.

CHAMPION CYMBIDIUM ORCHID
and Best Medium Cymbidium - Open

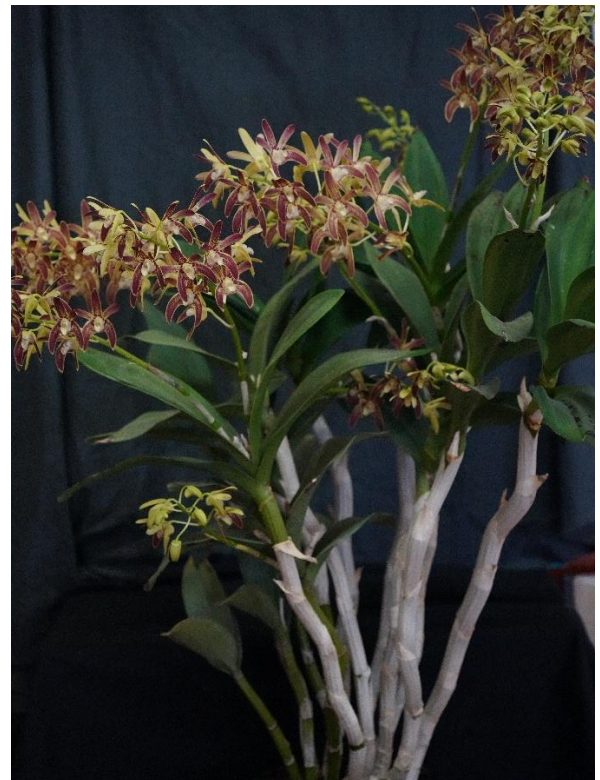

Cym. Mem. Myrtle Wain 'Lachie'
grown by D Wain

Cymbidium Memoria Myrtle Wain is an orchid hybrid originated by DJ Wain in 2018. It is a cross of *Cym. Jessie Blakiston* x *Cym. Flaming Vulcan*. *Cym. Mem. Myrtle Wain 'Lachie'* received an Award of Merit from the Australian Orchid Council in 2018, recognising the flower quality and presentation of this cultivar. It is noted for bold, deep-toned flowers.

CHAMPION AUSTRALIAN NATIVE
and Best Australian Native - Open

Den. Eclipse
grown by H Nam

Dendrobium Eclipse is an orchid hybrid originated by Down Under N.O. in 2006. It is a cross of *Den. Awesome* x *Den. speciosum*, meaning it is heavily influenced by *Dendrobium speciosum* (roughly 81%) resulting in its large, robust racemes of yellow to bronze-toned flowers.

Club calendar

Date	Event (events in blue are sponsored by other organisations/clubs)
16 September	Monthly meeting – speaker is Hendrik Venter
19-20 September	NEMOS Spring Show ; Hours: 9.00 am to 4.00 pm daily Venue: Bulleen Heights Secondary School, 221 Manningham Road, Lower Templestowe
2 October	Set-up day for our Spring Show
3-4 October	Our spectacular Spring Show
10 October	AGM & Guest Speaker, Aust Orchid Foundation (see notice later in newsletter)
21 October	Monthly meeting – speaker is Andrew Fernandez (Topic – deflasking)
18 November	Monthly meeting – speaker is Michael Coker (Topic – a mystery)
16 December	Another wonderful Christmas / End of year dinner (note it's a different date to our usual function)

Invitation to attend the Annual General Meeting of

The Australian Orchid Foundation

to hear the guest speaker

Prof. Rod Peakall

The Australian National University

Canberra, Australia

Rod Peakall is a Professor in Evolutionary Biology at the Australian National University. As ideal subjects for exploring a range of interesting scientific questions, orchids and their pollination have featured strongly across his research career. His work on Australian sexually deceptive orchids has captured the imagination of the public, educators and scientists around the world.

The title of his talk is:

The magic of chemistry in the pollination of Australian terrestrial orchids

Drawing on research that spans across scientific fields, he will describe how these orchids use specific and often new to science chemicals to achieve pollination. He will conclude the talk with a brief outline on his exciting and ongoing work on the underground orchids of NSW. Like sexually deceptive orchids, the 'magic' of chemistry is also critical for the pollination of these mysterious orchids that live entirely in the dark. The talk will be illustrated by beautiful photographs and fascinating video clips, some of which have not been previously shared with the public.

**Venue: City of Whitehorse Horticultural Centre
82 Jolimont Road, Forest Hill Vic. 3131**

Date: Saturday, 10 October 2025

Time: 2 pm for AGM followed by Rod's presentation.
Attendance at this meeting will also be possible via Zoom link.
Afternoon tea provided Plant sales and book sales

**PLEASE EMAIL: aof@australianorchidfoundation.org.au

Seedling Flowering First Time – Open

Paph. sukhakulii '2'
grown by H Nam

Paphiopedilum sukhakulii is an orchid species identified by Schoser & Senghas in 1965. Found in northeastern Thailand at elevations of 240 to 1000 meters, it is a small sized, hot to warm growing, humus epiphyte growing in sandy loam and leaf mold along streams, in dappled to moderate shade.

Best in Section – Open

Paph. sukhakulii
grown by M Coker

Paph. sukhakulii blooms in the late winter and spring on an erect, terminal, to 10" [25 cm] long, purple brown and white haired, single flowered inflorescence with a green, ovate floral bract that is 1/3 the length of the ovary. At lower elevations of its range it is often found growing with P. callosum.

INTERMEDIATE

Aust. Native Hybrid

1 st	Den. Waverley Splendour	P Kennedy
